Mountain View Council Meeting

The regular meeting of the Mountain View Municipality was held at Olds on Saturday last when the business was mostly of routine character.

By-laws were passed making grants to the Olds and Didsbury Agricultural Societies of \$50.00 each and the Didsbury and Olds Calf Clubs of \$15.00 each.

The secretary was instructed to send to all elevators in the district a list of all persons who have received seed grain relief during the present year and those of persons in arrears of payments for seed grain supplied in previous years.

A communication was read regarding sleeping sickness in horses. It was reported that there was a number of cases of the disease in the district. The secretary was instructed to give his assistance in obtaining vaccine for prevention of the disease.

The secretary reported that he had received from the Government a number of cards for persons wishing to obtain employment, identifying them as bona fide citizens of the province. Any person desiring such cards should apply to the municipal office.

The balance of the meeting was taken up with the passing of accounts and pay sheets.

Miss Jessie McCoy has obtained a position as dietician at the Drumheller hospital. She will take up her duties on August 23rd.

Boards Of Trade Hold Successful Meeting

The joint meeting of the Boards of Trade last Thursday evening was a very successful affair.

Mr. Ed. Ford, in the chair, welcomed the senior men on behalf of the Junior Board of Trade. He gave a brief outline of the large volume of business conducted in the town and district. His efficient handling of the meeting was subject to much favourable comment.

Mr. George Bevens emphasized the benefits accruing to all through the harmonious business relations of the town and district. He stressed the need of close co-operation for the mutual benefit of all.

Mr. Art Thomas submitted a report on a proposed swimming pool. He based his remarks on the pool recently installed in Carbon. The meeting was very receptive to the idea of a pool for Didsbury. Mr. Chambers assured the meeting of the co-operation of the Town, when certain difficulties in connection with the pool will have been settled.

Mayor Chambers gave a very interesting and constructive talk on possible projects to initiate. He sketched advantages of an illuminated sign and an attractive shrubbery at the "Y" of the new road leading into Didsbury. An attractive advertisement of good camping accommodation, clean rest rooms and a swimming pool, would be a good incentive for the motoring public to stop-in at Didsbury. Combined with the cleanliness and attractive appearance of our town, the reputation of Didsbury to travellers would overcome any reluctance a tourist might have in driving the additional mile.

In a brief entertainment period Mr. Dave McEwen gave two humorous sketches which would belie his Irish origin, and Ernie Clarke pounded briefly but effectively on the grand piano as a prelude to lunch. In spite of the remarkable capacity of Messrs. Reiber and Dunlop for chocolate cake, there was an abundance of lunch and coffee for all.

The J.B.T. is deeply appreciative of the interest displayed by the seniors, as evidenced by their attendance and participation in discussion. We hope it is the beginning of a close co-operation between the two bodies.

Olds Suffers More Hail.

Another hailstorm visited Olds Saturday evening, doing slight damage to already hailed crops in the southeastern part of the district. The storm lasted about ten minutes, a strong wind driving the hailstones, which were small. Gardens in the town suffered considerable damage. A 24 hour rain followed the hail storm. Two and a half inches of rain fell during the week-end.

Teachers Appointed

At a meeting of the School Board the teaching staff for the ensuing year was appointed. With the exception of Mr. D. Cameron of the High School staff, who has taken an appointment at Fort Saskatchewan, the same staff of teachers will continue.

Mr. Art Reiber, who has just completed his University course, was appointed on the high school staff.

Work is proceeding on the installation of an automatic stoker for the heating plant at the school and will be completed by the end of the week. With the new equipment, the school can be kept at a more even temperature during the winter months, and heating costs lowered by the use of cheaper fuel.

Guides' & Rangers' Tea Well Patronized.

The Girl Guides' and Rangers' tea on Saturday was well patronized considering the adverse weather conditions. Those attending the novel tea were conducted through the "Seven Stages Of Man" and partook of refreshments at each stage, from the nursery through to the venerable stage. Taking part were Sheila Durant as "nursemaid"; Elizabeth Austin, "school ma'am"; Lorna Carleton, "flapper"; Mrs. Steve Kacemar, "bride"; Lois Edwards as matron, thence to afternoon tea with the grand matrons.

The girls take this opportunity of thanking those who made possible the success of their novel tea.

Evangelical Church Notes

Next Sunday morning the Pastor will preach especially to children. Following the morning service, the annual childrens day program will be rendered. A special offering for missions will be received.

In the evening the subject will be "Our Glorious Leader."

WEEKLY SERMONETTES

Christianity is hard but gainful and happy. When we look to the reward we should not ask to have it easier. The Master whom we serve not only pays but gives; and that not in proportion to our earnings but according to His tender mercy.

Commences Harvesting.

W. Archer reported Tuesday that he had commenced cutting on a field of wheat and that he expected to continue with harvest, as the grain is ripening fast.

He also reported that several other farmers were cutting grain in the district east of town. Harvesting is expected to be general in that country early next week.

Demonstrate Judging At Springbank

Marion Levagood and Harvey Stevens, the judging team of the local calf club, represented the Didsbury Club at Springbank on Saturday, demonstrating to the newly formed club the proper methods of judging dairy stock. The team received many compliments upon their judging.

Scout and Cub Corner.

Scouts will muster 7.30 p.m. at depot platform tonight. Mr. Dick Wallace will be in charge. If wet, meeting to be held in the school basement.

Didsbury Eliminates Hillbillies In Playdowns

The Didsbury Softball Club advanced another notch in the intermediate playdowns when they eliminated the Calgary Hillbillies by a 14-8 score at the Mewata Stadium last Wednesday afternoon. The locals won the first game at Didsbury by a close margin of 7-6.

The game at Calgary was scoreless until the fourth when Brightman and E. Morrison brought in two runs for the visitors, and Calgary replied with three from Noble, Leew and Brakart.

In the fifth Didsbury settled down to steady play and four runs were scored by Berscht, Haldane and Krebs. Baker scored a lone point for Calgary, to end the period 6-4 in favor of Didsbury.

The sixth saw Haldane score for the visitors and Brakart for Calgary, making it 7-5, with Didsbury still in the lead.

Calgary took advantage of the breaks in the 7th, scoring three runs to take the lead for the second time in the game, at 8-7.

The visitors rallied in the 8th and batted in 7 runs through Berscht, Holub, Haldane, F. Evans, Krebs, Morrison and Morasch, the score then reading 14-8 in favor of Didsbury. There was no further score throughout the game, and Didsbury emerged worthy victors.

After the game the Didsbury boys with a half-a dozen of their fans enjoyed dinner at the Avenue Grill.

Didsbury's team was comprised of Roman Holub, Tuggle, Berscht, Haldane, A. Krebs, Brightman, F. Morrison and Morasch, Sub: Gabel, Wyman, V. Morrison, Grant and R. Shantz.

Notice to Patrons!

For the benefit of those who cannot possibly get in with their cream at the regular time during the cutting of the crops, we will be open from 8 p.m. to 9.00 on SATURDAYS for the next Four Weeks, August 13th to September 3rd.

Table Cream must be delivered at the usual time.

PLYMOUTH TWINE.

Buy CANADIAN
BINDER TWINE

- * Plymouth Twine is made in Canada by Canadian workmen in our mammoth factory at Welland, Ontario.
- * It is skillfully spun from clean, strong fiber and has uniform length, strength and evenness.
- * Constant testing insures evenness of spinning. This means freedom from breaks and delays during harvest.
- * Special winding prevents tangling and insures free running twine. Scientifically treated against insect damage.
- * Plymouth Twine is wrapped in a moisture-proof liner and then packed in clean, new burlap sacks. The finished bale of twine weighs 50-lbs. gross and is branded "Made in Canada."
- * The bag may be used as a grain sack, and the new rope lashing makes a most serviceable halter.
- * Plymouth Red Top is spun 600 feet to the pound. Each grade of Plymouth Binder Twine is guaranteed to average full length and strength and to possess the same Six-Points of Plymouth Superiority.

An Educational Need

"The strength of a nation depends to an incalculable extent upon its educational facilities."

A whole volume—nay, many volumes—of wisdom and truth are couched within the foregoing sentence, an extract from a brief submitted to the Rowell Commission on Dominion-provincial relations by two professors of the University of Toronto on behalf of the student body of the nation.

The purpose of the brief was to present to the Commission claims of students for the establishment of State scholarships to permit entry to the universities of the country of many who could never afford the opportunity which these institutions yield for broadening the mind and for training for leadership but who, otherwise, are well qualified.

The request for the establishment of such scholarships is based, not so much on the need for training minds which might subsequently be expected to be capable of contributing to technological development, but rather to ensure training of experts in the field of the social sciences, a sphere of activity in which, it is pointed out, comparatively little research work has been undertaken in Canada and for which no provision has yet been made in the programmes of the National Research Council.

Information supplied the Commission shows that in this respect Canada lags far behind the other Dominions as well as other leading countries outside the Commonwealth; that in this country there is no provision for State matriculation scholarships and that the number of awards from private sources is relatively small.

West In The Cold

Moreover, data and statistics contained in the brief demonstrate conclusively that in the matter of scholarships available from private sources the western provinces are discriminated against to an extraordinary but quite understandable degree. For, to quote the brief, "of 524 matriculation scholarships available annually in this Dominion having an aggregate value of \$108,140, the Province of Ontario receives 288 with an aggregate value of \$76,000, leaving less than half the amount to be distributed in 236 awards in the remaining eight provinces."

As a result some of the brightest minds are directed to the eastern institutions of learning and, again to quote the brief, "thus is the west deprived of the very men who might be expected to contribute most to a solution of her pressing economic, social and political problems."

Because of this situation and because of the inability of the provinces, and particularly the western provinces, to finance scholarships to anything like an adequate degree, it is suggested that Federal aid be sought to enable the provinces to finance State scholarships and thus provide at least the means to ensure the education of those who show greatest promise in the field where the west urgently needs assistance—the cultivation of minds capable and fully equipped to solve problems of great magnitude.

Not The Entrance Key

It might be urged in opposition to such a plan that already too many students are being turned out of western universities for whom apparently there is no place in the commercial and economic life of the country under present conditions, but this can at least be partially attributed to the fact that brilliance and ability do not furnish the open sesame to the university classroom.

In too many instances desks in the university classrooms are occupied by students who are sufficiently apt to scrape through entrance and subsequent tests with a minimum of effort and whose parents furnish the wherewithal simply because it is the thing to do; because a university degree is regarded as a hall mark of class distinction, or because it is believed that social or business contacts made there will be of some assistance in later years.

On the other hand many who are mentally equipped to a far greater degree and who could derive a great deal more benefit from a university education are unable to do so because of family poverty or because of their own inability to finance their way through college. Thus there is a real loss not only to the individual and the family but to the community and perhaps the nation. Scholarships, such as those proposed to the Rowell Commission would, to some extent at least, remedy this condition.

Of Further Importance

There is a further thought worthy of consideration when the establishment of state scholarships is under advisement. When it is remembered that the universities are expected to turn out men and women who will, and should be, leaders of opinion in their respective communities and provinces, the necessity of affording every opportunity to youth of brilliant mind, capable of clear and logical thinking, to pursue their studies to a conclusion, is highly important in a country which is only now shaping her future destiny, and in a day and generation when democratic institutions and form of government are threatened by new and untried political and social doctrines.

With a large number of people too inert to do their own thinking and willing to be stampeded in any direction at the behest of glib oratory, it is highly important that encouragement and opportunity be given to talent wherever it may be found and to give the best brains full opportunity for development in order that leadership in the future may be founded upon experience, logic and sound commonsense, if the country is to make progress and the future is to be assured.

People are reading fewer but better books than they used to, says a librarian. If they read only the better books they are certainly reading fewer.

Sir Henry Morgan, the famous pirate, was knighted by the King of England and made lieutenant-governor of Jamaica because of his fearless expeditions against the Spanish.

Religious Broadcasts

Sunday Afternoon Sermons May Be Started In October

Although the newly-created national advisory council on the broadcasting of religious services includes representatives of the five larger Canadian churches, smaller religious organizations will not be neglected in religious broadcasts, Major Gladstone Murray, general manager of the Canadian Broadcasting Corporation, indicated.

Smaller denominations, including the Salvation Army, Disciples of Christ, Christian Science and Latter Day Saints will be given opportunities to share in the broadcast.

The national council is composed of the following: Rev. Carl V. Farmer, Baptist; Rev. Briarly Browne and Rev. J. E. Ward, Church of England; Rev. J. B. Thompson and Rev. Joseph Wasson, Presbyterian; Mons. Edward M. Brennan and Rev. Charles Lanphier, Roman Catholic; Rev. J. R. Mutchmor and William R. Orr, United church. All are from Toronto. Mr. Ward is chairman and Mr. Mutchmor secretary of the council.

It is proposed to provide two national half-hour religious broadcasts Sunday afternoons and regular half-hour regional broadcasts of religious services Sunday mornings.

The morning broadcasts will not be started until January at the earliest but the afternoon broadcasts will likely begin in October.

The corporation has set aside one half-hour, 12:30 to 1 p.m. (M.S.T.), and the half-hour 3:00 to 3:30 p.m.; (M.S.T.) for the new broadcasts. The first half-hour has been allotted by the advisory council to the Roman Catholics and the second to the Protestant churches starting as follows: Oct. 2, Baptists; Oct. 9, Church of England; October 16, Presbyterians; Oct. 23, United Church.

Good News For Neighbors

Amateur Pilot Forbidden To Fly His Home-Made Plane

Herman Schapansky, Weatherford, Okla., the butter and egg farmer who pilots his home-made planes to one-point landings—on the nose—has been grounded.

He was ordered to stay out of the air because he has no pilot's license.

Neighbor farmers, accustomed to scurrying to storm cellars when they heard the sputter of Schapansky's motors, breathed a sigh of relief.

Schapansky—who soloed and crashed the first time in a junked Jenny biplane with a "model T" motor after only three flying lessons—said: "I'm a good flyer. They don't give an ambitious young man a break in aviation any more. How far do you think the Wright brothers and Lindbergh would have gone if they'd got caught in this red tape?"

It was said most of the time Schapansky flies directly down a highway, so when he crashes he will be in a convenient place where his wife can pick him up.

On his first solo flight, fortified only by the lessons he exchanged for chores at an airport, Schapansky said he went up 200 feet, stalled and crashed. Neighbors pulled him from the cockpit bleeding.

Undismayed, Schapansky built more planes. Few of them flew long and crackups became so regular his wife said she stood by a telephone, the family car and trailer waiting nearby, ready to get him and the plane when it plumed down in someone's pasture.

No person ever went up with Herman.

Making Use Of Drugs

Japanese Trying To Undermine Health Of Chinese In North

War has always brought misery in its train; but there can be nothing in history so foul as the manner in which the Japanese are now trying to undermine, by the use of drugs, the health and morals of the inhabitants of the occupied area in the north. China and the world will always remember the stern and effective steps taken by Generalissimo Chiang Kai-Shek to stamp out the drug traffic and will regard the Japanese with loathing for the policy they are now following of encouraging the use of drugs amongst the Chinese and foreigners who are temporarily within their sphere of influence.—Hong Kong Press.

Snakes shed their eyelids when they shed their skins. 2265

Only Firestone TIRES ARE GUM-DIPPED for EXTRA STRENGTH

EVERY FIBRE INSULATED WITH RUBBER

GUM-DIPPING is a patented Firestone process not used in any other tire. With it every hundred pounds of cord fabric absorbs eight pounds of rubber and, as a result, every fibre, every cord and every ply in a Firestone tire is coated and insulated with pure rubber to counteract internal heat and friction—the greatest enemy of tire life.

Due to this extra process, Firestone Gum-Dipped Cords have 58% longer flexing life. Yet you do not pay one cent more for this extra value. And you also get 2 Extra Cord Plies under the tread and the Firestone Scientifically Designed Safety Tread.

See the nearest Firestone Dealer today!

SELECTED RECIPES

SALMON MOLD

- 1 package Lemon Jell-O
- 1 pint hot water
- 3 tablespoons vinegar
- 1/2 teaspoon salt
- 4 teaspoons drained horse-radish
- 1 cup flaked salmon
- 1 cup cooked peas, fresh or canned
- 1 cup cooked diced carrots

Dissolve Jell-O in hot water. Add vinegar and 1/2 teaspoon salt. Pour small amount of Jell-O in bottom of loaf pan. Chill until firm. Chill remaining Jell-O until slightly thickened. Add 1/2 teaspoon salt and horse-radish to salmon and vegetables and mix very lightly. When remaining Jell-O is slightly thickened, fold in fish and vegetable mixture. Turn into loaf pan over firm Jell-O layer. Chill until firm. Unmold and cut in squares. Serve on crisp lettuce. Garnish with mayonnaise and sprigs of parsley. Serves 8.

BEEF LUNCHEON SALAD

- 1 package Lemon Jell-O
- 1 pint hot water
- 3 tablespoons vinegar
- 1 teaspoon salt
- 1 1/2 cups diced cooked beefs
- 1 1/2 cups shredded cabbage
- 1/4 cup diced green pepper
- 1/2 teaspoon scraped onion

Dissolve Jell-O in hot water. Add vinegar and 1/2 teaspoon salt. Chill until slightly thickened. Season beefs, cabbage, and green pepper with 1/2 teaspoon salt; add onion. Fold into slightly thickened Jell-O. Turn into individual molds. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise and slices of hard-cooked egg or stuffed egg. Serves 8.

In Java, thunderstorms occur on an average of 223 days a year.

Pilot Received High Award

Dropped Ammunition To Scouts Trapped By Tribesmen In India

The Distinguished Flying Cross has been awarded to Flight Lieut. G. E. Jackson, of No. 5 Army Co-operation Squadron in India. His daring flying saved 100 scouts from massacre when they were trapped on a hill by 500 Mahsud tribesmen, followers of the Fakir of Ipi.

Night was falling and the scouts had only 10 rounds of ammunition left per man when Jackson arrived and dropped by parachute 4,000 rounds in response to a message sent by pigeon. Three of the loads fell among the beleaguered troops and the fourth within retrievable distance.

Do All Farm Work

Sisters Have Managed For Forty Years Without Help

Miss Mary Williams has died at the Misses Williams' farm near Woodford, England, but her three sisters will continue to run the place without a man to help as the four had done for 40 years. The sisters plow, make hay and run a market garden, and with their ancient spinning wheel spin yarn. They also make their own clothes and stockings.

Methods Being Used For The Restoration Of Prairie Drouth Areas

A comprehensive outline of the difficulties and problems which are being successfully combated by the Prairie Farm Rehabilitation Board in the rehabilitation of the Prairie drought areas was given in a recent issue of Scientific Agriculture by Dr. E. S. Archibald, Director, Dominion Experimental Farms Service and Chairman, Land Utilization Committee, Prairie Farm Rehabilitation Act. The agricultural area in the Prairie Provinces comprises 55,700,000 acres of the 74,000,000 acres of cultivated land in Canada. Fully 54,600,000 acres are in grain and fallow, of which 13,000,000 acres are fallowed annually. Again, of the 40,000,000 acres of range and unimproved pasture in Canada, fully 33,000,000 acres are in the Prairie Provinces.

It should be remembered, states Dr. Archibald, that the drought area of recent years has been settled during the last 20 to 40 years during a cycle of years when rainfall was normal. The past eight years have been subnormal, yet it should not be forgotten that this area has contributed the largest percentage of wealth in wheat alone during the past 20 years to the sum of \$7,000,000,000. Vast values of other grains, beef, sheep, bacon, and poultry products also come from this area. What has been done, will again be produced. Hence the great national importance of replanned, readjusted, and rehabilitated agriculture in this area.

Succeeding years of disastrous drought, grasshopper damage, soil drifting, and necessary large scale relief to farmers in central and southern Saskatchewan, southwestern Manitoba, and southern Alberta, covering a period of five years, inclusive of 1934, convinced the Dominion Government that drastic and large scale rehabilitation measures were necessary if the enormous earning power of Western Canada, due to a population of most capable farmers in their particular type of production, was to be retained.

Consequently in April 1935, an act called the "Prairie Farm Rehabilitation Act" was passed unanimously in the House of Commons. The organization of Dominion Departmental forces, with wherever possible the co-operation of Provincial Departments of Agriculture and Lands was immediately undertaken. The many lines of endeavour fall into three general groups: (a) cultural; (b) land utilization, including the administration of reorganized agricultural community work, and (c) water development.

Cultural includes research, demonstrations, co-operative assistance to farmers in soil drifting control, soils research, pasture improvement, also soils, pasture, insect and economic surveys, comprising District Experiment Stations, reclamation stations, grass seeding, agricultural improvement associations, tree planting, soil drifting, aerial surveys, new rust resistant grains.

Under land utilization, the solution of the problem of farmers who have been located on light poor soils incapable of maintaining an agricultural population obviously is to determine the type of agriculture to which this land may again be adapted, entailing the establishment of community pastures, reserve grazing areas, staff organization, irrigation districts and feed and fodder relief inspection.

Water development has been one of the major activities in assisting the largest number of farmers with the making of dugouts to retain runoff water for domestic purposes and for livestock, small stock watering dams, small irrigation dams, community and municipal water projects, and large water development projects for irrigation, many of which have been completed and are now in full use.

No Longer Plentiful

Union leader at Seattle says white collar workers must organize. But where, oh where, have the white collar workers gone? We've just glanced around a roomful of chaps generally supposed to be in that class and could count only two white collars in the lot. The rest were blue, green, tan, gray, polka-dotted and doubtful.

Deaths From Drowning

Sir Frederick Banting Said To Be Working On Resuscitation Methods. Sir Frederick Banting is working to reduce Canada's annual death toll of 1,000 by drowning. The famous discoverer of the insulin treatment for diabetes and his associates believe they "have something" in the form of improved resuscitation techniques.

Actual death may not take place for several hours after apparent death by drowning, and Dr. Banting and his associates hope to be able to reach some definite conclusion as to the maximum time a person may spend under water without resuscitation becoming impossible.

"Health," the magazine of the Health League of Canada, gave an instance in its June issue of artificial respiration being applied successfully on a person who was under water 30 minutes.

The Toronto investigators seek to gather all possible exact data on resuscitation of persons after near-drowning. They point out that in the confusion attending drownings and near-drownings, it is seldom possible to make an exact record of the time the victim has been under water or the length of time spent in artificial respiration attempts.

They hope to be able to get exact information on these two points through expert observation on resuscitation work. They have also made a general request for information bearing on these questions, whether from doctors or from individuals who have been present.

The investigators know that in electrical shock cases artificial respiration has been successful after eight hours, and, therefore, they see no apparent reason for believing that prolonged efforts might not be equally successful in drowning as in other accidents.

Re-Vamp Old Laws

Quebec City Bringing Its Civic Regulations Up To Date

Old Quebec city with a re-organized archives bureau has been bringing its civic regulations up to date but one bylaw passed in 1844 and still on the book forbids splitting wood or doing carpentry work in the streets. Another old bylaw made it a punishable offence to hoist coal from the sidewalk to second or third storey windows above the heads of pedestrians.

Laws against cursing and swearing are still in vogue as Henry Pizotte found out when he was hauled into recorder's court on a charge of swearing at a neighbor.

A lengthy civic code governs relations of "master and servant." At least 100 years old it is still invoked to settle household disputes.

One section requires masters to treat servants "like their own children, safeguard their morals" and keep an eye on the servants religious practice.

British Empire Cereals

Rice is grown more extensively than any other cereal within the British Empire, but wheat follows closely in importance. The Empire is a small producer of maize (corn), states the Imperial Economic Committee; and, the area under rye in the Empire, except in Canada, is negligible, the aggregate production being less than one per cent. of the world total. Canada is the only exporting country of rye in the Empire, and rye imports in the Empire are almost entirely confined to the United Kingdom.

Token Of Friendship

President Frederico Laredo Bru has sent President Roosevelt a token of Cuban friendship. It is a 100-word message written on a piece of white human hair three inches long. Vincente Garcia Maldonado, Cuba's foremost miniature writer, labored 75 hours with a special pen and filtered ink to inscribe the words. The message can be read only through a microscope.

The moon and Mars are the only planets whose solid surfaces actually can be seen.

Illustration Stations

Show What Is Being Done In The Way Of Modern Agriculture

At the present time there are 183 illustration stations and 47 district experiment sub-stations established throughout Canada by the Experimental Farms Service, of the Dominion Department of Agriculture. Nineteen of these stations are in British Columbia, 24 in Alberta, 51 in Saskatchewan, 17 in Manitoba, 17 in Ontario, 51 in Quebec, 20 in New Brunswick, 17 in Nova Scotia, and 14 in Prince Edward Island. An illustration station is established in a neighbourhood for the edification and observation of all, and aims to take the lead in farm organization, cultural practices, and procedures best suited to the district. Orderly, tidy layout, balanced well-kept fields, and practical crops compel notice and suggest being copied in some particular on the home farm of an observer.

By visiting the illustration farm annually on a specified field day, residents of the countryside are brought face to face with what is being done in progressive agriculture. At the field day they discuss the work, ask questions, and listen to lectures which impart the findings, figures, and facts that have a definite bearing on local problems and conditions. Neighbouring farmers may also obtain from the operator of the illustration farm pure seed grain and breeding stock for improvement of their home produce.

In the illustration station program of farm organization and development, the sale of livestock and dairy products makes up the principal source of revenue of 131 of the 183 illustration stations and the 47 district experiment sub-stations. On the remainder, specialized grain farming, which includes the sale of wheat, oats, and barley, is the chief farm income. On many of the 131 stations, particularly on those that have been in operation for a considerable period, well-bred high-producing herds now appear. On some farms in Canada, the number of milk cows kept is small in comparison to the size of the farm, and in consequence of the relatively low production, the cash return is inadequate to meet living expenses, taxes, and other necessary expenses. Hence, in the illustration station program, the aim is to develop sufficient revenue from the sale of milk, beef, pork products, poultry or cash crops, such as cereals, grasses, and clovers to meet the necessary operating expenditures, which include comfortable support of the home on the farm.

Kept Comfortably Busy

In the family of Mr. and Mrs. James Crough of Otonabee township in Peterborough county, Ont., there are 17 children. As families are rated in this age that is a large one. The mother has stated that every other day was baking day and the one in between was wash day; and even if those words were spoken in jest they must contain a measure of truth which would be generously large.

Tunbridge Wells, England, has sold its war tank relic for scrap iron.

Better Living Conditions In The World Of The Future Pictured By Scientists

Status Is Confusing

Controversy Over Whether Eire Is Country Or Only New State

Eire's constitutional status and that of the new president, Dr. Douglas Hyde, has provided truly Irish paradoxes for British constitutional lawyers.

Controversy at present fills columns of the United Kingdom and Irish press on such questions as, first, is Eire the name of a country or only of a new state, as De Valera's new constitution defines it?

Secondly, is Eire a republic or a kingdom? The constitution does not say which. If Eire is not a republic, it cannot have a president. If it is a kingdom, it should acknowledge the existence of King George.

Thirdly, if the name Eire refers only to the state and not to the country itself, then, according to some critics, it is not in the world of geography, nor out of it.

"Dr. Douglas Hyde has been nominated president of something that does not exist," says one legal authority, "and hovers upon Dublin like a fifth storey of a house that has no foundation or floors to uphold him."

However, the defenders of Eire's new status say Eire is a sovereign state, as independent as Switzerland or Belgium, and there is no such thing as "His Majesty's government in Eire."

Old Frontiersman

Picturesque Character Found Dead In His Cabin At Yale, B.C.

Joe McKenzie, 79, old-time telegrapher and trainman during the early 80's when Andrew Onderonk was blasting out the rock-walled canyons of the Fraser Valley for the Canadian Pacific Railway right-of-way, was found dead in his cabin on the river bank at Yale, B.C. He made his home there for close to a half-century.

His death removes one of the most picturesque characters of the west. He wore his whiskers to the third waistcoat button and his hair curled about his shoulders—custom of the early days of the frontier which he continued to his death.

Among those who called here to pay tribute to him was Alan Sullivan, Canadian novelist who three years ago spent several days in the vicinity seeking local color for his book "The Track of Destiny," later filmed as "The Great Divide." On that occasion Mr. Sullivan got considerable data from McKenzie.

Willing To Oblige

It wasn't exactly his work, but when Fireman Charles Coleman, North Sydney, N.S., received a telephone call while on duty asking him if a fireman would take a ladder and close an office window that had been left open, he readily complied.

Handiwork That Adds Distinction

Household Arts by Alice Brooks

A Scrap Quilt That You'll Enjoy Making
Fan of Friendship

PATTERN 6184

Here's a quilt a beginner will enjoy making and yet a skilled quilter would be proud to show as her needlework. The fan—so easy to piece—is of scraps of material; the patches that make the lattice are easy to cut since the material can be cut in strips, the patches snipped off as needed. Pattern 6184 contains the Block Chart; carefully drawn pattern pieces; directions for cutting, sewing and finishing; yardage chart; diagram of quilt.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

In the world of the future, say 2,000 years hence, you may wear clothes of spun glass, live in a plastic house, and eat vegetables grown in water. There'll be several crops a year, there won't be any weeds and you will be warmed by the harnessed energy of the sun.

In other words, stop worrying. The world's going to go on and on, and people will live better and better for thousands of years, no matter if all the copper and zinc and lead and cotton and wool and everything else that now seems to make it go have entirely disappeared.

That, in essence, was what Dr. Frank E. Lathe, National Research Council of Canada, told the American Association for the Advancement of Science, in a paper on the world's sources of supplies, and in an interview.

"Although the future of some of the base metals is obscure, the world as a whole need fear no shortage for an indefinite period of the raw materials for clothing, shelter, heat, power and the principal necessities and luxuries of life," he said.

"In the case of certain natural resources that are definitely exhaustible, nature has made abundant provision of possible substitutes."

Take clothing. The United States grows half of the world's production of cotton on 30 or 40 million acres, or two per cent. of its total area. Australia produces 25 per cent. of the world's wool and has plenty more room for sheep. In the new world crops and animals won't die of disease, so that increases the supply. But even if wool and cotton ran out, there are always synthetic fibres like rayon. In Italy they are making wool from skim milk, in Japan they are making soy bean fibres and in America glass wool.

"The potential supply," said Dr. Lathe, "is inexhaustible."

As for food, there's enough, said Dr. Lathe, to provide a world three or four times the present population. Insect and weed and disease control will increase crops enormously, and if all the land runs out, vegetables will be grown in water. All the stock will be fat and happy, because they will be fed the perfect diet.

And for shelter, the forests, given good care, could produce 50 cubic feet an acre and more, he said. If there were no wood, there still would be sugar cane wastes, straw and cornstalks to make plastics, and rocks and bricks, since clay is among the most abundant of all mineral resources.

The tonnage of coal in the world is so large that at the maximum rate at which it has yet been mined it would last 5,000 years, said Dr. Lathe. And even if present deposits of crude oil, estimated to last fifty or one hundred years, were exhausted, there are large deposits of oil shales and in Alberta deposits of tars which would supply the world with oil for centuries.

Besides water power, which is permanent, there are sources of power in the winds and tides, and a new attempt to control the heat and power of the sun's rays is now under way at the Massachusetts Institute of Technology on a grant from the Cabot Endowment Fund of two-thirds of a million dollars.

A Matter Of Choice

Hong Kong's Cantonese Restaurants Have Different Prices For Each Floor

Quaint customs are to be found everywhere in the world but no more so than in Hong Kong, where Cantonese restaurants have different prices for different floors, the higher the floor the higher the price. The food is the same but the roof garden level has the prettiest waitresses, best service, most cheering surroundings and real ivory instead of imitation chopsticks. So it's quite an inducement to go higher up and pay the higher price in Hong Kong.

In Belleville, Ont., lacking one hip and one leg—but normal in all other ways—a Holstein calf born recently is hobbling about quite easily. A show company has made an offer for the animal.

The World of Wheat

By H. G. L. STRANGE

Popular Delusions and Amazing Absurdities! Such are the extraordinary beliefs that the student of history finds have been held by large numbers of people at various times throughout the ages.

In Canada, for instance, only a short time ago, it was seriously contended "That the climate over the Prairies had changed, that the desert was marching northward, that the drought was permanent, and that never again could we expect normal rainfall." Another statement was: "That even though it rained the land would not produce good crops as it had done in the past, because farmers stupidly had robbed the soil of fertility and fibre."

Yet last autumn, once again normal rainfalls occurred, and over large areas, abundant rains have fallen so far during this growing season.

In addition, the soil in the drought areas, that many said had lost its fertility and fibre, is again growing a splendid wheat crop.

The truth is, that over a term of years climate does not seem to change, and that given normal rainfall average yields will certainly be produced. Also it seems that prophecies about rainfall and yields are misleading, futile and vain.

Following factors have tended to raise price: Hail and grasshoppers cause further damage in Western Canada -- Greece buys Danubian wheat -- France to store wheat for military supplies -- Japan and Russia clash on border of Manchukuo -- Unsettled political conditions in the far east -- Unfavourable advices from Russian spring wheat territory.

Following factors have tended to lower price: International Institute of Agriculture expects largest northern hemisphere wheat crop since world war -- Large rye crops in Poland Russia and Balkan states -- Holland raises import levy on cereals -- Greece resells Australian wheat -- Expects wheat crop in United Kingdom much larger than last year

August Snow

An August snowstorm thrilled tourists vacationing in Banff National Park last Sunday.

While it was raining in the town of Banff and at Lake Louise, snow swirled around the higher mountain peaks and covered the new Lake Louise-Jasper highway.

Many American visitors drove to the Summit, about 30 miles north of Lake Louise and enjoyed the novelty of watching, at close quarters, a summer blizzard.

WEEKLY JOKE

Chatty neighbor: "I suppose you don't stand for any war arguments among your boarders."

Boarding House Mistress: "Oh, yes. You see our biggest eater gets so interested that he forgets to eat, and our next largest eater gets so mad that he leaves before the meal is half over."

Alberta Crop Report.

Issued by the Alberta Department of Agriculture

Edmonton, July 26th.—Crop conditions throughout most of the Province continues to be optimistic, according to the sixth crop report issued by the Alberta Department of Agriculture under the direction of Honorable D. B. Mullen, Minister of Agriculture.

A large portion of the drought area has prospects for a crop, even the dryer part will harvest some crop, if general rain falls within the next eight to ten days. Crop districts Cardston, Vulcan, Brooks, Rockyford Olds and Red Deer report condition excellent. The eastern part of Sedgewick and Consort have suffered from drought as in the vicinity of Empress, Foremost and Chinou area.

Some districts report all wheat headed and filling, whereas others indicate 60 to 80 per cent headed. Over most of the drought area and in the area south of a line from Vermilion, Sangudo, Edson, the coarse grains are good to excellent. Native hay crops are yielding up to one and a half tons per acre, with spear grass seed ripened, and it is feared some danger may occur to the lambs on this account. Pastures have maintained vigorous growth with the exception of drier parts as outlined above.

Crop reports for St. Paul de Metis, the greater part of Athabasca, Peace River and Grande Prairie do not have such good crop prospects. In these districts continued dry, hot weather has reduced the yield. Pastures are dried up and a feed shortage might occur. However, the season has not advanced sufficiently to clearly estimate this probability.

A plentiful supply of feed in the form of good pastures continues available for livestock, in practically all districts of the Province. Reports would indicate that all types of livestock are making good growth, and lambs and calves are doing very well. Markets are somewhat slow but prices remain steady. Buyers are looking for finished animals which are not very plentiful at this time.

Some concern is felt in some districts over the outbreak of sickness affecting horses. It should be most emphatically stressed that allowing horses to drink from sloughs at this time of the year should be avoided.

Conditions in the dairy industry continue satisfactory; rainfall has been sufficient in most areas to maintain good pasture, and there is a steady increase in production.

The poultry industry has enjoyed a profitable period, with egg production lessening before the pullets produce. Eggs are now increasing in price. Broilers and fliers find a steady market. However, the spring chickens are now more numerous and a slight reduction in selling price is noted.

The Industrial East Spends over \$40,000,000 with the Western Farmer each year

Any fellow who consumes over \$40,000,000 worth of Western goods is worth knowing. And when you know him, you'll find he's a pretty good fellow — a worker and a family man like yourself, who likes to keep busy.

Your purchase of a Canadian-built car helps keep him busy and on a payroll. For Eastern automobile plants alone employ over 18,000 workers and in turn, spread employment — and purchasing power — over many other industries, including textiles, paints, glass, chemicals and steel.

Sure, it's a good thing to know that the Eastern industrial worker is busy and happy and in a position to maintain and augment his purchases which in 1936 alone included over 80,000 tons of fresh dressed meats, 175,705 head of cattle, 21,144 calves and 41,557 hogs to say nothing of 10,000 tons of butter and poultry, eggs, honey, grain products and other commodities to the value of more than \$15,000,000.

For statistical and further information about this industry, write to Automotive Industries, 1006 Lumsden Building, Toronto.

Westcott Notes

Westcott W.I. held the last meeting at the home of Mrs. John Spillman. The attendance was good, including a number of visitors. Mrs. H. Levagood was in charge of the topic "Home Economics," which she conducted in the nature of a question box. Much useful information was gathered in this way. The importance of a useful hobby for one's leisure time was stressed and a wonderful scrap book belonging to one of the visitors was shown in this connection. A display of salads was another feature of the meeting. This Institute sent two members to the Farm Women's Week at Olds, and is having Miss McCaig of Olds on August 11th at the home of Mrs. Hughes, so August promises to be a busy month. The next meeting is to be held at the home of Mrs. Macfarlane on Thursday, August 25th.

Mrs. Ed. Klinck and Mrs. Roland Webster returned from Olds College last Thursday evening after spending four days there attending the short course put on for the Farm Women's Week.

Miss Edith Webster entertained last Thursday afternoon in honour of her brother, Rodney Webster, who celebrated his 10th birthday.

IN MEMORIAM

In loving memory of "Mother,"
Lizzie (Shelly) Brubacher.
Died August 12th, 1935.

A precious one from us is gone,
A voice we loved is stilled.
A place is vacant in our home
Which never can be filled.
We miss the sunshine of her face,
Her fond and loving care.
Our home is dark without you, "Mother,"
We miss you everywhere.
God in His wisdom has recalled
The boon His love had given.
And though the body moulders here,
The soul is safe in Heaven.
Ever remembered by bereaved husband
and family.

The Fight Goes On!

Western farmers must persist in their fight for a greater degree of price security in the marketing of their main product—wheat.

To continue the fight for just and equitable treatment a strong concentration of effort is required.

The natural focal point for such an effort is the Wheat Pool movement.

"Away to The Canadian Rockies"

A new and harmonious note in travel literature is the latest Brinley "Away" book—"Away to The Canadian Rockies and British Columbia"—by Gordon Brinley, with illustrations by her artistic husband, Putnam Brinley. Drawn to Western Canada by a booklet on the pleasures enjoyed by the Trail Riders of the Canadian Rockies, the "Travelling Brinleys" spent an entire summer in the pursuit of happiness—and of notes and illustrations for an addition to their popular series of travel books. In her happy, lucid style, Gordon Brinley, the writer, tells of their visit to Calgary to see the

West's largest rodeo and prepare for a long pack trip to Mount Assiniboine. They spent a holiday with the Sky-Line Trail Hikers and the Trail Riders of the Canadian Rockies, visiting Moraine Lake, Larch Valley, and magnificent Yoho Valley, and thoroughly enjoyed the novelty of living in Indian teepees, fishing for trout in lakes in the clouds, and thrilling to the changing pageantry of their surroundings. Further adventures carried them to such famous lakes as Louise, Emerald, and O'Hara, right over the Great Divide into British Columbia, and on to Vancouver where they discovered

another vivid countryside and excellent fishing in the Vancouver Island salmon runs. The two adventure-loving Americans have a large following of readers who will see the Canadian West through their eyes, attracted by the charming drawings by Mr. Brinley, the blithe and readable text by Mrs. Brinley, and the definite practical information they incorporate in their book for those who would follow in their footsteps. The pictures above show Mr. and Mrs. Brinley (photo by Peter Whyte) and some of the Canadian Rockies' scenery they like best.

WORLD HAPPENINGS BRIEFLY TOLD

A university president was chosen to head the British Broadcasting Corporation.

Despite constant Japanese bombings, the Canton-Hankow railway realized a profit of \$4,000,000 for the financial year ending June 30.

A. P. Patrick, one of the first residents of Calgary and the oldest practicing surveyor in the Dominion, was 90 years old on July 18.

Miss Majorie S. Leitch, of Johannesburg, South Africa, is making a tour of Canada and the United States to study Canadian and American architecture.

Remodelling of hundreds of grain elevators in the west closed during drouth years is now under way to handle the 1938 crop, grain men stated.

Constable E. R. S. Pink of the Royal Canadian Mounted Police, Ottawa, suffered a fractured skull when the motorcycle he was driving collided with an automobile.

Adelard Godbout, leader of the provincial Liberal party, announced sweeping plans for reorganization of the Liberal political organization in Quebec.

Auxiliary armament plants designed to supplement the output of government munition factories in case of an emergency are to be established in South Australia, Defence Minister H. V. C. Thorby announced.

Descabezado volcano, 12,750 feet above sea level on the frontier between Argentina and Chile, erupted recently, pouring forth ashes and causing persons living in the vicinity to flee. The volcano had been comparatively quiet since 1932.

Old Timers Believe Story

That Satan's Footprints Are On Island Off Nova Scotia

About three miles off the eastern coast of Nova Scotia is a small island, known as White Head light, where Satan is supposed to have walked, according to this story by Anne Loney.

Old-timers do not take kindly to your doubting their story and will promptly offer to show you his footprints in order to prove their statement. Some will tell you that Captain Kidd buried his loot here and that the devil is guarding it; others, that a sailor murdered two children and disposed of their bodies on this spot, while still others claim it is the place where many scenes of mutiny, piracy and bloodshed were enacted.

Whatever the explanation, there is no doubt about the footprints. I have seen them myself. They appear to be those of someone who walked out of the woods, across the rocks and into a clump of bushes. Those of one foot are clear and defined, while those of the other are round and deformed the latter according to the story-tellers, being positive proof that they are those of the devil, for has he not one good foot and one cloven hoof?

Makes Journey Pleasant

If Motorist Has Sense Of Humor And Uses It

The correspondent of Highways Bulletin says if you are one of the many to whom driving is no longer a pleasure, here is a hint that may be helpful. Next time you start out on a trip, take that chip off your shoulder! And take your sense of humor along. Promise yourself that you won't let little things disturb you, and see what happens. If someone attempts to steal your right of way, let him have it. Don't yell at him, but smile instead. Be indulgent, as you would be with the small boy who reaches for the largest piece of cake on the plate. A safe journey—and a surprisingly pleasant journey—will be your reward.

Proved Once More

Hon. R. J. Manion's supporters used an advertisement in the Ottawa Journal to set forth the attainments of their candidate for the Conservative leadership, states W. L. Clark in the Windsor Star. It was a nice ad and had position opposite the editorial page where all the delegates could see it. As Dr. Manion walked away with the leadership race, once again we point out that it pays to advertise in the newspapers.

R. K. McINTOSH NOW CHAIRMAN OF BOARD OF GENERAL FOODS LIMITED

R. T. MOHAN

R. K. McIntosh, who for a number of years has been Vice-President and General Manager of General Foods Limited, has been elected to the office of Chairman of the Board of General Foods Limited, in which position he will operate in an advisory capacity to his successor, R. T. Mohan, who has been elected Vice-President and General Manager of General Foods Limited.

In retiring from active management of the Company, Mr. McIntosh has elected to take advantage of the corporation's retirement plan. The management of General Foods has requested Mr. McIntosh to continue in an advisory capacity to the management of General Foods Limited.

Mr. Mohan has been Managing Director of Douglas-Pectin Limited, at Cobourg, and in charge of production of the company's Montreal plant which produces Walter Baker Chocolate and Cocoa, Franklin Baker Coconut, Maxwell House and Sanka Coffee, Minute Tapioca and Jell-O.

R. K. McINTOSH

He is also a director of Douglas-Pectin Limited and Grape-Nuts Company Limited, both of London, England. In addition to his present responsibilities, Mr. Mohan will take over his new duties as rapidly as possible.

Mr. Mohan is a graduate of McGill and Queen's Universities, and has had a number of years' experience in food production and sales.

Under Mr. McIntosh's leadership, the sales of the company during 1937 were the largest in its history, while the sales in the first six months of 1938 exceeded the same period last year.

By the end of 1938, Mr. McIntosh will have completed 40 years in the food industry. He joined P. McIntosh and Son in 1896. This firm, which was formed by his grandfather and father in 1876, was the first to put packaged cereals on the Canadian market. McIntosh joined the Canadian Postum Company, the predecessor of General Foods, in 1920.

Bravery Has Been Recognized

Award Given To Cat For Rescuing Kitten From Fire

Whitey, a thin-faced, big-eyed mother cat, has received a bravery citation from the American Humane Association because she rescued her family of kittens from a burning building.

Presentation of the award was made a public occasion at the Buffalo City Hall with Mayor Tom Holling officiating in person. Announcement of the award was made by the association.

Until June 22, Whitey and her brood lived in a barn near the home of Whitey's mistress, Mrs. Mary Wydro. Early that day the barn caught fire.

Fire engines came, and firemen saw Whitey emerge from the billowing smoke, with three kittens. And then Whitey committed her act of bravery. One of the kittens—Teenie—was missing. She dodged between the legs of firemen playing water on the barn and returned triumphantly with her week-old kitten in her mouth.

Indians Make Complaint

Appeal To King George To Keep White Invaders Off Reservation

A plea to King George to "keep the whites off the tribal land" of the Stoney Indians on the Kootenay plains, 75 miles west of Rocky Mountain House, has been forwarded to London.

In a letter signed by Chief Walking Eagle, it is urged His Majesty carry out the promises of the "great white queen," Queen Victoria.

In 1877, the chief declares Queen Victoria promised his tribe, "You will have plenty game, tobacco food." Now white men have invaded their lands, hunting and trapping, and he wants the Kootenay plains declared a reservation for Indians only.

The Stoney, says Chief Walking Eagle, have lived on the Kootenay plains "since the world began." They refuse to move to the Morley reserve, 45 miles west of Calgary.

The Hymn Said So

After the early morning services the sexton found a lady's wrist watch at the Church of England in Bridgetown, Barbadoes. The parson announced the discovery at the following service and said that the owner could have the watch by applying at the vestry. He thereupon announced Hymn 362: "Lord Her Watch Thy Church Is Keeping." 2265

FOR A YOUNGER, SLIMMER LOOK

By Anne Adams

Fashion magic for the figure that requires slenderizing lines—that's what Anne Adams Pattern 4850 offers! Everything about it is superlatively flattering. The puff-top sleeves make the shoulders seem wider, while the gored hips (in contrast) appear so much slimmer. The deep yoke sections curve in the most gracious manner—and are in lovely harmony with the new rounded neckline. You have choice of three sleeves: two short styles for now, and a long tailored version for early Fall. Even if you've never sewed before, you'll find this pattern easy to use, sure to fit—with the illustrated Sewing Instructor to help you. Buy a supple fabric, and trim it with buttons, flowers or a bow.

Pattern 4850 is available in women's sizes 36, 38, 40, 42, 44 and 46. Size 36 takes 3½ yards 39 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Holiday Precautions

Should Guard Against And Watch Water Supply

The annual summer holiday is designed to improve the health of you and your children. Care should be taken that proper benefit of this holiday is gained and that its benefit is not impaired by accident or preventable disease. The following precautions are eminently worth while.

1. Be sure that the water supply is safe. If you are not satisfied with the character of this supply, boil the water. Cool and aerate it by pouring the water from one jug to another. Also ask the Provincial Health Department for information as to a practical method of purifying water. Some provinces furnish a simple apparatus for this purpose at cost. An additional precaution is the use of anti-typhoid vaccine which also is supplied by the Health Department.

2. Do not take unnecessary risks when swimming. Learn the simplicity of the Schafer method of artificial respiration and teach your lads how to practice it on one another.

3. Take a small first-aid kit with you. There will always be burns, bites and scratches to be dressed.

4. If you are camping out, extinguish all fires before you leave camp.

5. One of the most important precautions is that you and your children avoid the use of raw milk. If pasteurized milk is not available, heat the milk in a double boiler to 145 degrees F. Maintain this temperature for 30 minutes. Then rapidly cool the milk to 40 to 50 degrees F, and keep it at this temperature until it is used. Pasteurization kills all the disease germs in the milk. The use of milk so treated does not injure the qualities of the product. Its use may save your child from a host of milk-borne diseases.

Woman Doctor Won

Performed Operation On Native Guide Under Adverse Conditions

A thrilling story of rescue and hardship on the freezing slopes of the Drakensburg mountains, the western boundary of Natal, has reached Durban, South Africa. A native mountain guide was on his way down the mountain to the National Park hostel when a sleeping bag fell from the pack horse and rolled to the cliff edge. The native tried to recover it, but the tuft of grass on which he was standing gave way. After a short sheer drop he rolled about 350 feet down a steep slope over boulders and rocks.

His native companion climbed down to where the guide was lying badly injured and unconscious. Unable to move him, he made a small shelter with a blanket and hurried off for help. A woman doctor who was visiting the hostel volunteered to join the rescue party, and that night performed a successful operation on the injured man in a deserted cave high up the mountain. An old tin can was used for disinfecting the instruments, and the operation was performed by the flickering light of candles. The native is now recovering. —Brandon Sun.

Oldest Paddle Steamer

Built In 1847 Is Still Working In Coastal Trade

The old paddle steamer Premier, 129 tons, has been taken out of service and broken up at the age of 92. For more than 80 years she was an excursion steamer running out of Weymouth, England, and was probably the oldest paddle steamer still working. She was built in 1846. Now that she is gone, the oldest British steamer left is the John, an iron sloop with engines aft, built in 1849 and still working in the coastal trade out of Bristol.

Easily Explained

A lawyer was cross-examining a witness.

"You say that the fence was about fourteen feet high, and that you were standing on the ground—not mounted on a ladder or anything?"

"I do," responded the witness.

"In that case," said counsel, "perhaps you will be good enough to explain to the court how it was that you a man of five feet four, could see what happened on the other side of the fence fourteen feet high?"

"Certainly," chirped the witness, suavely. "There was a knot hole in the fence."

In Prison Twenty Years

Woman Spy Once Condemned To Death Enters Convent

A woman who 20 years ago was condemned to die before a firing squad as a spy, recently left prison to become a nun.

For a few hours, on her way from prison cell to convent cell, she was at liberty in a world she had not seen since 1918.

A pale, white-haired figure in black, she passed through the gates of Rennes prison in Brittany.

She stopped and blinked at the summer sunshine. There was fear and bewilderment in her eyes as she looked at the bustle and listened to the noise around her.

It was a very different world from that which Marie Ducret last saw when, at the age of 22, she was sent to prison.

She had been well known to British soldiers in the camps near Abbeville and Amiens.

In 1918 she was arrested on the Somme front and brought before an Allies' court-martial, accused of spying. She had given the Germans secret information about French and British troop movements.

She had mingled freely with the soldiers near the front line, picking up information. She was caught red-handed by a French officer.

She was condemned to be shot. But it was then October, 1918, and in the excitement of the last offensive she was forgotten.

This saved her life. After the armistice her death sentence was commuted to imprisonment for life.

In prison she was consumed with remorse for what she had done. She sought peace and solace in religion. She was a perfect prisoner, quiet, diligent, pious. She hardly ever spoke. Her leisure time was spent in her cell reading the Bible.

The prison chaplain was touched by her penitence. The nuns who visited the prison took a special interest in her.

Her cell was the one occupied by Maria Mancini, the pretty Corsican girl who was sentenced to penal servitude for life for having participated in the famous vendetta which caused the death of several Corsican bandits.

Efforts were begun to try to secure a pardon for her. She declared that if she were released she wanted nothing of life but to enter a convent.

When she left prison she looked very thin, but younger than her 42 years.

She went straight to the secluded Convent of Economy, where she is to become a sister of the nuns of Bethanie.

Grasping the arm of her son, who took her out of the prison, she arrived on the verge of collapse at the gates of the cloisters and had to be helped in by two nuns.

Makes Satisfactory Rugs

Germany Has Perfected Project For Using Human Hair

To free Germany further from dependence on foreign raw materials an announcement has been made of the perfection of a project for the manufacture of carpet yarns from human hair and artificial wool—cell wool or viscose. Human hair, especially women's, has proved very satisfactory for rugs, and that branch of the Nationalist party devoted to the collection of junk is now collecting it also. Approximately eight cents per pound is paid for it. Barber shops will be combed by party scrap squads to collect it.

"JUST ACROSS THE STREET..."

● Yes... they're using Gyproc in that new building—all the interior walls and ceilings.

The contractor knows that more and more people are using Gyproc as they learn about Gyproc's many advantages; that it won't crack or sag or warp; that it's made from fire-proof mineral gypsum; that it is permanent. Gyproc is as easy to cut and nail as lumber. Saves time and expense in construction, with no muss or bother.

Yes, I asked him about that—the joints are invisible—the finished walls and ceilings are absolutely smooth—perfect for any type of decorating.

A free booklet tells all about Gyproc for new buildings. Write us to-day.

POOR MAN'S GOLD
COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER... W.N.U. SERVICE

CHAPTER I.

Jack Hammond reflected, as he walked up from the wharf, that rain was Prince Rupert's most bountiful crop.

He made the climb from the water front and cut across the little terraced park, where totem poles stood gleaming with moisture and grotesquely lonely. Everything dripped in Prince Rupert this morning, even the discolored, stuffed Kadiak bear in front of Al Monson's trading store. At last Hammond halted abruptly, looking over the wooden fence of a back yard. Howls and whines had centred his attention.

"What are you trying to do with that dog?" he asked. A man halted in his effort to kick a harnessed mongrel into progress along a muddy space before a makeshift sleigh, weighted with stones.

"Going to make a sled dog out of him."

"That bozo? He hasn't got the weight for it."

"Oh, he's pretty strong." The man grinned. "Say, they'll be buying anything where this dog's going?"

"Where's that?"

The pseudo-trainer jerked his head toward the white pinnacles of distant mountains.

"Over the hills there in B.C.," the man said, "up the Caribou river, somewhere around the valley of the Stikine. Haven't you heard about it?"

Hammond's features had become strangely grim.

"What's going on?"

"Where've you been that you haven't read the papers?"

"On the Aleutian, coming up from Vancouver."

The dog trainer stared.

"The ship that got in this morning?" he asked. "And you didn't

know about it? Then you must have been deaf, dumb and blind. There were plenty of others who came on that boat—just because of it."

"Because of what?" Jack Hammond's hands, where they gripped the fence, were strangely discolored.

"Well, if you ain't kidding—the gold rush. Two fellows found placer gold up there. A couple of guys named McKenzie Joe Britten and his partner, Jack Hammond."

"Oh, I see," said Hammond jerkily.

"Yeh." The volunteer trainer rubbed casually at the loose fur of his dog. "Guess they'd figured to keep it quiet, all for themselves, you know. But this Hammond goes down to Seattle to see some old girl he'd been stuck on ever since he was a kid. Then he got on a big bust and spilled everything. It's been in all the papers, I guess. Quite a romance."

"Yes, quite," said Hammond thinly. "So everybody's figuring on going up there, eh?"

"Everybody and his brother. That's why I thought I'd train this dog."

"That dog can't make the grade in the Stikine country. Zero's a hot day around there this time of year. No chest. Thin legs. A light coat from being around this coast country. No hair on his feet—he'd last about two days on the trail."

"That ain't my worry. Let the fellow who buys him lose sleep over that." He gave the dog a kick, shouting: "Mush! Mush on, there!"

The dog's howls remained in Jack Hammond's ears as he walked slowly up the street. So this was a gold rush—this an echo of the broken laughter and excited jabberings of himself and McKenzie Joe Britten, one day last autumn, up there in the far-away Stikine country. Then their discovery of placer or nugget gold, poor man's gold, as it is so often called, had brought great visions. Here was new money, waiting to be washed from the gravel of a river, and of value the minute it was found; no need for great shafts and expensive machinery to extract this wealth.

There had been big talk that day

of what new gold meant to a wait-

ing world, the happiness it would bring, the accomplishments. There had been no thought of the greed, the suffering, the jealousies and hatred which must inevitably follow.

He passed Al Monson's trading store and Ben Deacon's. Both were jammed with purchasers; many had the white faces of persons who knew nothing of wind or pelting ice particles, the whip of a blizzard or the blaze of sun on ice. Hammond tried to tell himself that it was none of his business. He entered the hotel.

"Joe here?" he asked the clerk.

"McKenzie Joe? No, he pulled out yesterday morning, all in a rush."

"Down North?"

"Didn't say. Must have. Got out on a work train. Left a note for you though, Mr. Hammond."

Jack unfolded the scrawled letter that had been left by his bearded partner. It was brusque and jerkily frank.

"Well, I figured you might play the fool if you ever got to Seattle and met that girl, but I never thought you'd spill the beans like you did. Why didn't you wait until you hit the bush again before you got drunk? There'll be a thousand fools up in the Stikine country before break-up. I'm hitting out of here with short supplies to get in there and protect our interests before the rush starts. See our lawyer and be sure our claims and leases are in good shape. Then come on with supplies as quick as you can."

Hammond turned to the waiting boy beside him and ordered his bags taken to his room. Then he headed for the door; again on the street, he started toward a three-story building a few blocks away.

His course was a broken one. Townspeople he knew halted him to question the accuracy of newspaper stories which Jack Hammond had not seen. His evasiveness only nettled them.

"What if you haven't seen the newspapers?" they asked. "You made the discovery. The Vancouver papers have been full of it. You know all about it—what's the use of trying to keep it a secret?"

Soon a crowd had gathered about him. Hammond fenced frantically.

A big man, with a faint break of accent in his voice, poked a hard-skinned, hewed-out face close to that of Hammond.

"My name's Olson," he announced.

"I've got a map here—suppose you point out the place to us."

Hammond pulled at his breath.

"Maybe I'd better," he agreed. Then, as Olson poked the map before him, "Didn't I see you on the boat from Vancouver?"

"Yah, you saw me," said Olson.

"And a lot of others."

"Why didn't you come to me then? I could have explained all this to you—maybe you wouldn't have been so anxious about getting off here."

"You got off, didn't you?" asked the man with the pack on his back.

"That was enough for me," came another voice. Then a short man, red-faced, and with an excitable manner, edged forward.

"How about me? I saw the story in a Winnipeg paper and took a plane for Jasper Park. Then caught the train up here."

"Yeh, and I came from Prince George," cut in another member of the crowd. "I thought we'd go in from Alaska—around Wrangell."

"Look here," asked Olson, "you didn't try to throw us off the trail, getting off here, at Prince Rupert?"

Hammond spread his hands in a gesture of disgust, and for a moment silenced them.

"How in the world could I try to throw you off, when I didn't even know you were on my trail? None of you came near me on the boat."

"Yah," laughed Olson, "how could me? You were in your cabin most of the time. Getting over that head you must have had when you got aboard down at Seattle. Some time you had down there, yah?"

Hammond straightened. He raised a work-thickened hand and, removing his hat, allowed the cooling rain to fall for a moment on his dark tousled hair. He regarded the crowd which hemmed him in with a look almost of pity in his dark eyes.

"Listen, fellows," he began, "you

don't know what you're getting into by trying to beat that country."

"But the map shows that it's just back of Wrangell," Olson insisted.

"To hell with the map!" Hammond broke forth angrily. "Certainly it's back of Wrangell. Maybe seventy-five miles, a hundred, I don't know."

"Just below the Stikine river, against the Alaskan border," supplemented the red-faced man from Winnipeg. "The newspaper said so."

"I suppose that makes it a fact," Hammond answered sarcastically.

"Then why don't you go on to Wrangell by boat and up the Stikine river?"

"You can't go up the Stikine this time of year," an outsider argued.

"Might as well try to walk on icicles."

"Will you let me explain the set-up?" Hammond insisted. "If you go in by way of the Stikine, you've got to make nearly 200 miles and double back. You can't turn off—that river runs through canyons almost to Telegraph creek—way past the discovery. It's next to impossible to cover the Stikine route on the ice."

"Boats make that river in the summer time," someone insisted.

"Certainly; paddle wheelers. But this isn't summer. The spring break-

"You Didn't Try to Throw Us Off the Trail?"

up in that country isn't due for months. Think that over."

Then Jack Hammond stood silent, listening to the jangle of words about him. Men were arguing about whether or not the newspaper was correct, as if any inaccuracy were a personal affront. All in an instant, the thought of gold had torn reason to shreds. Then Olson caught him by the arm and shot the question: (To Be Continued)

New Railway Ruling

Transport Act Enabling Railways To Make Agreed Charges

Provisions of the Transport Act enabling railways to make agreed charges with customers will come into effect probably early in September. The act was passed at last session of parliament but certain portions only come into effect when proclaimed.

The railway companies were particularly anxious, when the bill was before parliament, that the agreed charges sections of the bill should become law, claiming it would put them on a more even footing with truck competition.

Under provisions of the Transport Act the railways will be able to make contracts with individual shippers to transport their goods at rates lower than the regular published tariffs on condition a shipper gives the railway company all its business. These agreements have to be ratified by the transport board.

Using Statue Of Stalin

The Georgian features of Joseph V. Stalin will dominate the Soviet building at the 1939 World's Fair in New York, instead of red symbolism. Two prominent sculptors, Bogoluboff and Ingal, have been ordered to design a statue of the Communist dictator, scaled to the size of the building, for which architects are drawing designs.

Cricket fighting is a popular sport in China. The crickets battle in a bamboo arena.

TRY IT TOMORROW

It Happens Sometimes

Automatic Elevator In New York Block Went On Rampage

If you get the creeps in one of those automatic elevators where you push the buttons yourself, it may not be entirely unjustified.

Mildred Watson, 19, a Negro maid, stepped into one in the six-storey apartment house in New York, where she works and pushed the button to go down.

The elevator sank to the first floor, stopped with a bump, and abruptly started up again.

At the sixth floor it stopped and abruptly started down again.

Then it went up again.

Then it went down again.

Then it went up again.

That went on for quite a while until the building superintendent suspected there was something irregular about the elevator making so many non-stop round trips.

He called the police and a squad of officers went into the basement and finally stopped the berserk conveyance.

Mildred stepped out, in good health, but slightly bewildered.

Builds Fortune

Manager Of Aircraft Company Accomplishes Much in Five Years

Frederick Handley Page, 53-year-old and stoutish general manager of the aircraft company he founded, has made himself a new fortune in five years and done big things for shareholders in the firm. Now he is leaving for Canada as a member of the commission which will arrange for the manufacture of heavy bombers in the Dominion.

Handley Page, Ltd., announced a final dividend of 20 per cent. tax-free for 1937, plus a capital bonus of 50 per cent. These followed an interim dividend of 10 per cent. less tax and last December a capital bonus 100 per cent.

Basis of Handley Page's new fortune was his realization of the possibilities of the slotted wing device that keeps aeroplanes from spinning when they are stalled.

Quill Cutter Kept Busy

Demand for quill pens is so great in London that one quill cutter is making nearly 1,000 a week. A large London bank still provides its employees with quill pens. Goose quills are used as a rule, but pens for fine decorative work are made from crow quills. The cutter has been in the business for 50 years.

Romantic Couple Together Again
In Brilliant Film

Carole Lombard and Fred Mac-
Murray, the romantic team of
"Hands Across the Table" and "A
Princess Comes Across," are together
again in "Swing High, Swing Low,"
a romance with music, at the Opera
House this weekend.

"Swing High, Swing Low" is the
story of Carole Lombard, as the girl
whose love and faith in a ne'er-do-
well trumpet player lifts him to the
pinnacle of success but robs her of
his love. He discovers that he can-
not succeed without her and returns
to beg her forgiveness.

The story is set in Panama and
New York City, and there are many
gorgeous settings. Dorothy Lamour
is in the elaborate cast, which also
includes Charlie Butterworth, Jean
Dixon, Harvey Stephens and many
others.

CARD OF THANKS

We wish to sincerely thank our
friends and neighbors for their ex-
pressions of sympathy and kindly
help during our bereavement.
M. B. Clemens and family.

LOCAL & GENERAL

Miss Doris Peterson, of Olds, was
a visitor for a few days last week
with her aunt, Mrs. Gus Heine.

Mr. and Mrs. Russell Berscht, of
Innisfail, were visitors Friday even-
ing with Mr. and Mrs. J. V. Berscht.

Mr. Pete Miquelon left on Monday
for Innisfail, where he will take
charge of the C.P.R. depot during
the agent's vacation.

For best values in harvest gloves
buy at Scott's, 40c per pair.

Miss Marie Chambers has return-
ed from her vacation at Banff, where
she visited her sister, Mrs. Ben
Woodworth.

Nick Nowak is again on the job at
his shoe repair at Frank Kaufman's
after receiving treatment last week
in Calgary for a nasal infection.

Mr. G. W. Sutherland, of Ponoka,
was a visitor with Mrs. George Smith
last weekend. On his return north
he was accompanied by Mrs. Suther-
land and daughter Shirley.

Blow hot, blow cold... that's
love! You'll hear that call to arms in
"Swing High, Swing Low," at the
movies Friday-Saturday, with Carole
Lombard, Fred McMurray the stars.

Miss Mary Parrott, who recently
resigned as matron of Didsbury Hos-
pital, left for Santa Monica, Cali-
fornia this week, where she will visit
with relatives.

For best values in all lines of
harvest shoes and clothing go to
Scott's.

Local teachers who attended the
provincial summer schools at Ed-
monton and Calgary returned last
weekend as follows: Messrs. Art
Reiber and Arthur Evans from the
capital city and Messrs. Fred Evans
and C. R. Ford from Calgary.

Frank Durrer and Eric Schwesin-
ger returned on Monday from their
motor tour of Banff national park.
Despite minor radio and auto
troubles, they reported a glorious
time and saw everything worth see-
ing, including a drive up the new
Jasper highway. On the return trip
they took in Turner Valley to com-
plete their vacation.

Frost and Wood binders, see the
latest in horse and tractor types—
Mac & Boettger

Mr. and Mrs. Wilfred Klein and
daughter Wilma, Mr. Otto Klein,
and Mr. and Mrs. Vess Klein of
Olds, returned Sunday from a week's
motoring vacation at Nelson, B.C.,
where they were the guests of Mr.
and Mrs. W. J. Smiley, formerly of
Didsbury. They also visited at Trail
with Mrs. Bob Rose, sister to Mrs.
Wilfred Klein. On the return trip
the party stopped off at Banff.

Milt Tracksell spent his vacation
motoring in the Banff national park
last week. While in Banff he came
across Frank Durrer and Eric Schwe-
singer, whose car at that time was
almost "hors de combat" due to a
low battery. Milt acted the good
Samaritan and got the boys to drive
him around in his coupe to see the
sights. He reports that the boys' radio
was good—on one station.

The 1938 provincial track and
field meet of the Alberta Branch of
the Women's Amateur Athletic
Federation of Canada will be
held under the auspices of the Ed-
monton Ladies Athletic Club on
Labor Day, to take place in Edmon-
ton's new \$50,000 stadium.

Particulars of the meet and entry
forms can be obtained from Miss
Juanita Lawrence, secretary, 9311
104th Avenue, Edmonton.

Mr. and Mrs. Franklin returned
Saturday from a motor tour with
Mr. and Mrs. Jack Rattray and son,
of Cremona. While away Mr. and
Mrs. Franklin visited the latter's
sister in Idaho and old friends at
Waterton, Portland, California and
Vancouver. Points of interest taken
in en route included Waterton Lakes,
Glacier Park, Yellowstone Park and
the Pacific coastal points. Sam
reports that they travelled 4,616
miles and had only one flat tire.

For Holland Twine see George
Parsons at B-A. service station, or
A. H. Foote (31c)

Don't worry about your binder
canvas. Take it to Scott's and have
it properly repaired.

LOCAL & GENERAL

Miss Helen Drew, of Claresholm,
was visiting with her friend Miss
Jessie McCoy last week.

Rev. and Mrs. A. S. Coughell are
visiting friends at Warner, Alberta,
this week. They will return Friday.

Mrs. Ed. Watkin, daughter Valeta
and Mrs. Armstrong, Mrs. Watkin's
sister, are holidaying at Sylvan Lake

Mr. W. M. McFarlane of Vancou-
ver is visiting with his brother, Mr.
Bob McFarlane west of town.

Norman McLeod, who attended
the convention of the Canadian
Corps Association, returned home
Friday. After the convention he
visited relatives in Ontario.

A Melville Anderson, Optome-
trist and Optician, 224 8th Ave W.,
Calgary, established since 1910, will
be in Didsbury at the Rosebud Hotel
Monday afternoon August 22. (2)

Miss Jessie Topley, who had been
vacationing at the coast, is spending
a few days with her parents before
returning to her duties at the Royal
Alexandria Hospital at Edmonton.

The annual meeting of the
W.C.T.U. will be held at the home
of Mrs. P. H. Lantz, Thursday
August 18th at 8 p.m. The super-
intendents of departments are asked
to bring reports.

Rev. and Mrs. E. H. Birdsall of
Kenton, Manitoba who had spent
the past two weeks with the former's
parents, left for Edmonton on Satur-
day, stopping over for the day with
Rev. and Mrs. Otto Rollis, of Bow-
den, enroute.

Bill Hartley and Don Lamont
leave this afternoon on their hike to
Banff. J. E. Gooder will drive them
as far as Cochrane, from where they
will strike trail 14 miles west, follow-
ing the north bank of the Ghost to
Devil's Gap, then west to Lake
Minnewanka and so to Banff.

T. E. Scott carries a full line of
binder canvas repair parts.
